Do the write thing

Did you ever get in a fight before? If you didn't, then did you ever see someone get in a fight with someone else? Fights, arguments, and stresses are all types of violence. Violence is a really bad thing that usually leads people to death. One day at 5:00 p.m. I was getting ready to go to a carnival and all my family members were coming because the carnival was going to pass by our house. My mom decorated my face for me, it was like Halloween. When we were done with music getting closer to our house, I hurried and got my spot next to the wall to see the carnival pass by. About five minutes later, this big truck with loud music in it and lots of people in front and dancing, and so were everybody else. About three or four trucks passed by and when the third truck was
passing by, that's when I saw what violence really was. This guy named Marcus was just having fun at the carnival until someone accidentally hit him in his head. The person that accidentally hit him was Benny, and he really didn't mean to hit Marcus on purpose. Meanwhile, Marcus was a very strict person who took everything seriously. Marcus turned around and yelled at the poor, innocent Benny. Benny was getting scared and Marcus had punched, kicked, and spit on him. Benny was just laying on the floor getting hit, he was starting to bleed. Police officers came and took Marcus to jail. I was shocked and horrified about that, poor Benny. I've seen violence lots of times now and it has to stop now. I want to set good examples for little kids so they won't grow up doing the wrong thing. I want to find a way to show everybody how violence is not good and how people died from violence. The violence has got to go to an end and we can all find a way to stop it if we work hard all together as a team. It would've been so beautiful to see everyone all together acting like brothers and sisters with no violence at all. So come on everybody, let's all STOP THE VIOLENCE!! Please.
