YOUTH VIOLENCE

In the United States there is a lot of youth violence. It's when kids/teenager's commit crimes. Like doing drugs, murder, stealing and more. In my opinion I think we need to put a stop to youth violence and a lot of other people agree with me.

Causes of youth violence are drugs, murder, gangs, jail, and death. Also a lot of people that commit youth violence surely have guilt sorrow and some of the time they are even traumatize by what they did. In my opinion I think that the kids must regret what they have done and wish that they had done it.

Youth violence affects my life by making my community unsafe by public place being unsafe and by making the streets unsafe to. Things like this stop people from going outside because they think that they will be hurt or even killed.

A few things' that people can do to stop youth violence is they can call the police if something bad has happened. Tell someone about what
has happen or going to happen. Or you could just stay off of the streets.

I hope that I have convinced you that we need to put a stop to youth violence and we need to put a stop to it NOW!!!!!!!!!!!!!!!
