Do the write thing essay

Violence has affected my life because it took my uncle. Youth violence took my uncle's life after that I wanted to make sure this was stopped. Youth violence has taken so many lives for no reason at all. It is all just pointless all this violence needs to stop.

I'm not sure what is really the cause of youth violence all I know is it is pointless and needs to stop. I believe it happens because they were hurt in some way shape or form. They believe since they were hurt it is there turn to hurt others. Sometimes they are jealous of the person they are hurting. Some people may get a sick thrill out of hurting others.

I can let someone know if I see or hear anything. This means for me if I see bullying I can report it. I can only do little things to stop youth violence. These little things can make a huge difference. If enough people try to stop it and stay in school we can stop the violence one step at a time.
Do the math please:

\[ \frac{\text{the sum of 2}}{2} \]

Addison's final argument was the final argument. The monkey fell to the ground with a thud.

I forgot to write down the monkey's name.

I knew it then, I knew it then. The monkey's name is 'Thud'.

Because the problem is that we need to solve for the sum of the two numbers.

Please allow me to guide you through this procedure. Since the monkey's name is 'Thud', it's clear that we need to solve for the sum of the two numbers.

I can't let someone know if I can't.

I should've proceeded more the way it was.

I can only think of a few suggestions:

1. Talk to the monkey.
2. Have the monkey solve the problem.
3. Solve the problem on your own.

I'm not sure if I can solve it but...

the answer is not easy to find.
