VIOLENCE ESSAY

1. Honestly violence doesn't affect my life although I've heard people get shot and I've heard people get abused. The people this has happened to are not at all in my life. I live in Egglesdon I've seen and heard many things so what is violent to you may be something I see every day.

2. The cause of youth violence is being raised badly, falling into peer pressure, just wanting to fit in. Youth violence is a long range of things whether its getting in a fight or shooting someone its wrong.

3. To be honest nothing other than longer sentences, more police officers. Once your used to it no program or teacher going to help you your mind will be set
