In my life, violence doesn't really affect my life, but it does a little. Violence affects my life a little because of where I live. I live in a city where there is always a gang at the court. So when I go to the court, I play like two games with my brother one time I won very fast to my house. That's how violence affects my life.

I think that the cause of your violence is when they see other people or their friends making violence, they think it's cool to do the same do that they will do. I also think that the cause of your violence in your community are the people around them.

For me to help stopping your violence.
