Youth violence

Everyone can do something for youth violence
I can discuss all the consequences
That happens and might happen
If the youth violence continues
Such as
Death
Injuries
Prison
I would explain to them that the route of forgetting things
Bad memories,
Horrible childhood,
Or a simple anger or envy of some kind
There is no reason or point for someone to engage in
Violence
As an individual in my community I can also
Express my life stories and life experiences
And engage in my point that
Violence is never the answer to anything
Or
Anyone
That there is a bright future a head if them
That not contains violence!!!!!
