Stop the violence, please!

Have you ever heard the word violence before? No, yes? Well I know that I have. Not only hear it, but I also know what it is! Violence is bad, it can happen all over the world. So what this means is that it's a bad thing to harm, hurt, or kill a person and damage property. When I say harm, hurt or kill, that's like saying threatening. Today is the day for you to know the bad about violence, and how it has affected our lives, especially to know how it should be stopped!! Now please listen carefully... 

So since we're talking about violence, has it affected your life? Oh! Well in that case, violence has also affected my life. To be more specific, it has affected me at school, and at my neighborhood. The ways that violence has affected me in school is one when my friends talk bad about me behind my back, and two when they (friends) make fun of me, like about my clothes, hair, etc!!
And so that is called humiliation. Whenever my friends do both of these things to me, I get really sad and mad that I think I am a horrible person. But in order to get over with it, I just ignore them and forget about it, oh and think of something happy or funny. So whenever I do this, it helps. Now, if that happens to you, just do what I say and it will help, trust me. So, that is what happened at school.

Now in my neighborhood it's way different. The ways that violence has affected me in my neighborhood is one when they drink and get drunk. When they do this, I get really scared that I think they (neighbors) might do something bad. But not just that they also fight by using very bad words! Every time I hear this I say "wow, these people loud and noisy!" This gets me so scared, also. Adding to when my get drunk, when they do this, I feel like they might go and kill someone! That's why I
I always say stop the violence; please! Why? well because this is a way that involves craziness! So, will you stop the violence?

Did you ever wonder how violence causes? Me no.
Honestly I never took the time to think about it. But now since I'm mentioning it, I'm actually getting good ideas of how violence causes! The ways of how violence causes is one being drunk, as I said. When a person gets drunk, that person may get way out of hand to kill a person, with a gun, knife, etc. Or another way is when the person gets drunk and is yelling at his wife, that person (he especially can be hitting her. So that is not good, of course! Another way that violence causes is the way you speak. What I mean by that is bad language!
For example: if there's an issue going on, like something bad, and the person's is using bad word than that's violence! Why? Well, because the person is saying the b word or the f word to the other person, so that's violence.

What really hurts me the most is that when people do this, like getting drunk or hitting each other, little kids can learn all of this and might do it or learn that it's right, and it's not! So this is one of the reasons I want violence to stop. Don't you agree?

Violence, violence, violence!
If their was something I can do to stop it, I would put signs up all over the neighbor and the city. These signs would say "please stop violence, it's for your safety!" So if that doesn't work, then my community (neighborhood) and my school will have a meeting talking about how we should put a big stop about violence! Also how we should help the
World become a better living; this way adults and kids (especially) are not going to be afraid to go outside whether it's in the day or night! That's one other thing I wanted to say; is that I don't want this to happen, kids being afraid to go outside and play or go hang out. I want kids to be free outside playing! This was also very sad and mad for me. Again, don't you agree?

Well, well, well! So what do you think, now? Don't you agree How violence should be stopped, and How it has been affecting our lives!
Yes, right! So please, just stop the violence, we (kids) and adults want to live a normal life, with nobody being scared! Let's make the difference!
