Youth Violence

We are here to help the reason I say this is because in the past couple of years people and kids all around the world have been bullied some kids are being bullied so much that they have killed themselves. Some kids don't even kill themselves they just cut themselves or cause pain to themselves. I think we should stop all this violence if you want to know some ways of how to stop violence I say you should keep reading.
Violence has affected my life by when I was in third grade I was bullied. I was made fun of how I dressed, my size, the way I talked and the way I looked. I felt so much pain when they said all of those hurtful things but I didn’t let them get to me. I chose not to listen to them because if I did, I knew that they wouldn’t stop so after I stop listening to them they stopped calling me names and I felt so much better.

The causes of youth violence is kids try to change themselves they cut themselves they even some times end up killing themselves. So I say you shouldn’t try to change yourself. You should be proud of who you are. You shouldn’t cut yourself because you can die from cutting something and you shouldn’t kill yourself.
because ending your life isn't a good way to end it you shouldn't even be listening to them.

What I could do about youth violence is by whenever I see it I would help the person when there will getting bullied so there will be no harm in the school or in my neighborhood I wish some day there will be no more violence in the world. If I could I would try to stop all of the bulling. Now people don't bully each other that much because there is a new law saying "No bullying" if this law was not real I think there would be lots of kids dead. But gladly there isn't.
In conclusion I say there should be less bullying in the world because lots of people can get hurt people get bullied so much that they end up killing themselves and when they do that the family of the child will be very very sad. If you also think bullying is a bad habit and if you ever
