Have you ever been bullied, fought, or have ever been physically made fun of? Because I know that there are many people around America have been, especially children under 18. My purpose in this essay is to inform you about how youth violence has affected my life and others.

To be honest, I have been physically bullied almost all of my life. Sometimes it was about my appearance, other times it would just be funny to make fun of. I get bullied every day and I know for some kids it is worse. That is why I would like to help those people.

Like I said in my last paragraph, I get bullied because of my physical appearance and the people that why me do it just for the fun of it. But there are many other ways to be bullied like if you are smaller than others or do something worse than others.
I know that but I feel better people about myself and I need to do these things to you.

It's something that does those things to you.

I don't think you should all be friends and join forces and stop the violence.
