Violence?

If you have problems in your life, please listen! It can be bullying, killing, and gun. Don't ask a little to help you because he don't know about violence. Ask a bigger friend and adults to help you. Violence are very scary. If you are in trouble, your parents worry about you so much. Violence is very dangerous and it could be everywhere. It could make you hurt and worry. We all could call 911 and tell our parents about it.

There are violences in my schools and when I was playing sports. Sometime there are violence outside, restaurant and sometime friend's house. Violence is when bad people do bad thing like killing or bullying. It can hurt people and kill people. The people should have more education so they know how to respect people. The United States should not have
gun and police should not have it, too because some police are bad and they can kill people with their guns.

Violence can make you sad and merry. Sometimes it can kill you. Sometimes people die because they got mad. They might jump off the building. They got mad and they hate their self. Sometimes people get mad and they buy a weapon and that is a bad idea. People might be scare and they will not be that brave. All of us should have more education and not hurt people.
I would tell my teacher about the violence if I'm in school or field trip. When I'm at home or playing a sport, I would tell an adult I trust or my parents because my parents care about me. You can call 911 when you needed to. Your parents or family can help stop the violences. We all can call 911 for help when we are in danger or lost. 911 is very helpful and safe. Sometimes police came too slow and that is a bad thing. My advice to you is to call early.

Violence is very dangerous and it could be everywhere. It could make you hurt and worry. We all could call 911 and tell our parents. You need to get safe and listen to your parents. So if you have problems, please call me 911.
