Youth Violence

By taking action, I can prevent the youth violence in my community which has affected my life by me having to be careful where I walk. Youth violence happens alot in America. Would you want to see your child everyday or seeing them 5 times a week and knowing their not doing what's best for them.

Violence looks like a two way patch to me. You either the good side or the bad side.

My entire essay is going to prove why youth violence needs to stop. Youth violence has affected most of my life. I have to be careful where I walk, kids be shooting, most of my friends are in gangs, etc. Youth violence can change anybody's life. Do you want your life changed like mine? When you see youth violence remember what I said, "It can change anybody's life."

Youth violence is used by guns, gangs, and fights. Swearing and disagreements cause youth violence. A person I know was swearing at my friend so my friend started arguing with him. I told them to stop before they fought. Youth violence happens to alot of people. STOP IT!
I can change youth violence by telling an adult, try to convince them to stop. Compare my life to theirs; who's is more complicated? If I tell a adult they have more of a chance to make them stop. If I try to convince them, they might stop for a little bit then keep doing it. If I compare my life to theirs, most likely my life is better.

My community has a lot of youth violence. I need them to stop. Can you help?

By taking action, I can prevent the youth violence in my community, which has affected my life. It is going to improve by that we can work safer outside and be able to do more things. Would you want to do what you have to do or feel like you can't go outside because there's a shooting? PLEASE HELP!
