"Do the Write Thing"

Sometimes violence happens with kids and adults even when they are trying to stay out of trouble. For example, let’s say if an adult is walking home and another person purposely bumps into the adult. This can cause an argument. Both the kid or adult can get hurt for no reason. Just like on the news people cry because of all the violence. They are always putting pictures up of the kid and when they died. On Thursday, February 28, 2013.

The news showed and innocent baby and his little brother were shot by their grandmother. It was very emotional for the neighbors and parents. There was a Connecticut tragedy where a lot of kids died as well as some adults. They displayed this on the billboards and they displayed other people who died. This is not okay. We should do the right thing more often and help each other. Violence hurts people and their loved ones. It hurts other kids who knew them.

Sometimes when you pass by graves at a cemetery it is emotional for people and parents to look at. At funerals it hurts the families and puts people’s minds in a hurtful place. Violence just keeps going on and on all over the world. This should be a message. What’s wrong with people? These are people’s families and people’s loved ones. Violence needs to stop. Just stop the violence!
