Do The Write Thing

What is violence? Violence is hurting somebody physically with your hands in a way that causes a character to defend their self. Violence is fighting in a way that causes gang members to use weapons in an unsupervised way or unmentioned by the police. Violence is abuse. Violence is revenge that causes a way you may have to break the law to do. Violence is bullying somebody and makes the victim hurt themselves because of what they had to experience. Violence is watching something unnecessary and doing it to somebody. This is what violence is in my perspective.

How has violence affected your life? How violence affected my life is when I was just a little girl, I lived in the projects and there was always men fighting brutally. I was afraid of all of the violence that happened in the projects. I didn’t feel safe at all. It made me want to move. When they were fighting I was always sitting on the entry of the stairs. They always had weapons, and they would always stare each other or try to. It was a bad experience for me to watch at such an early childhood. I didn’t want to get hurt so I would always run back into my house with my mother. That is how violence has affected my life.

What are some causes of youth violence? Some causes of youth violence are when somebody talks about another person, and that other person hears that they were talking about them. Then they decided to believe what they hear, and end up wanted to fight the person that was talking about them. Another cause of youth violence is when you are representing a gang or territory and you’re in a different territory representing their territory. Another cause of youth violence is getting into problems that don’t involve you or if you snitch to anybody like the police. Finally another cause of youth violence is
when you have drama with a gang and you’re in their hood or territory representing a different hood. Those are some causes of youth violence.

What can you do to reduce youth violence? What I can do to reduce youth violence is ask to get help in our community. Another thing I can do to reduce youth violence is suggest people to get a therapist and have someone to talk to. I also can ask police to ask all gang members to start a program to teach them their consequences in being in a bad role in their communities. Another thing I can do is suggest people to stay out of a gang and not be a gang member. Another thing I can do to reduce youth violence is tell the police that there are problems happen in a certain area. Finally another thing I can do is suggest people to move into a quiet area and tell them not to have contact with any gang or members of a gang. Those are something’s I can do to reduce youth violence.
