Violence has affected my life by me seeing and hearing that kids all around fight each other for no reason. For me this is sad because kids that fight usually either do it for fun or to solve their problems. But this is pointless because violence is not fun and is a serious matter. There are many ways to solve problems without fighting.

The causes of violence are that kids think that it can solve problems when it really can’t. They also think it is fun to fight when it is really not and could hurt or kill someone. Violence cannot be tolerated and must end immediately.

Violence can be stopped by Kids working out their problems by talking about them and coming to an agreement. Instead of fighting for fun kids can go outside and find other ways to have fun like going outside and playing sports like: basketball, soccer, tennis, lacrosse, swimming, skiing, and plenty of other sports. This will help kids have fun, stay fit, and also keep their mind of violence. And if kids still have problems with violence they can be talked to about the bad effects of violence from a family member, a friend, a teacher and any other trusted adult.

These are ways to spread the knowledge about the bad effects of violence and stop the world from the terrible act of youth violence!!!!
Do the Write Thing Essay

The cause of violence can be stopped by filling in all the blank spaces filling our brains from values. Violence cannot be ignored or excused and it is a problem that we need to fight to create a reality of peace and prosperity. This will help those who are suffering and also keep them from violence and harm.

Welcome to a family member's family and offer your support and love to all children and their families. Let us do what is right and promote peace and safety over violence and war.
