1. In the Ask a Librarian menu on the library homepage, which of the following support options are available from librarians? Select all that apply:
   a. 24/7 Chat
   b. E-Mail
   c. Phone
   d. Text Message
   e. Schedule an Appointment
   f. Searchable Knowledgebase of FAQs

2. After watching the video on different advanced search techniques in databases (posted on the SPORTDiscus page on the Research Guide), navigate to SPORTDiscus via the link on your library Research Guide.
   a. To start with, conduct a simple, basic search for: energy drinks exercise.
      How many results did you find? ................................................................................................................
   b. Next, think about at least 2 different advanced search strategies discussed in the video that you could use to refine this search, and write those strategies below:
      i. Strategy 1: .............................................................................................................................................
      ..............................................................................................................................................................
      ii. Strategy 2: ..........................................................................................................................................
      ..............................................................................................................................................................
      iii. Of the 3 searches you tried, which one gave you the best results? Why do you think that is?
      ..............................................................................................................................................................
      ..............................................................................................................................................................
      ..............................................................................................................................................................

   a. To start with, conduct a simple, basic search for: energy drinks exercise.
      On the results screen, limit your search to articles published within the last 5 years.
      How many results did you find? ................................................................................................................
   b. Next, use the MeSH database to build a MeSH search for the concepts “energy drinks” and “exercise.” What does your search builder box look like after you have added both concepts as MeSH terms?
      ..............................................................................................................................................................
      ..............................................................................................................................................................
c. Run the search with your MeSH terms, and limit your results to articles published in the last 5 years. How many results did you get?

d. Discuss the differences in results that you retrieved doing a basic search versus a MeSH search. Why did you get a different number of results from each search? Which set of search results seems more relevant for our topic?

   b. Click on a “FullText@HealeyLibrary” link to the right of your search results.

   c. Are you able to access the full-text of this article through one of our databases?

      Circle: YES | NO

5. Look at the bibliography or reference list for the article you opened in Question 4.

      a. Is the citation for a book or an article?

      b. How do you know?

      c. Based on the instructions in the video, were you able to locate the item cited in the reference, either in our catalogs/databases or to request through interlibrary loan?

      Circle: YES | NO

      d. If the citation is for an article and you searched for it in Google Scholar, did you see any “Cited By” references linked below the search result?

      Circle: YES | NO

6. After reviewing the brief tutorials about RefWorks (posted on the RefWorks page on the Research Guide), navigate to the RefWorks home page via the link your library Research Guide and complete the following steps:

      a. Create a new account (or log in to your account if you already have a RefWorks account)

      b. Create a folder titled EHS 460

      c. In SPORTDiscus, search for: energy drinks exercise.

      d. Limit your results to scholarly, peer-reviewed articles published in the last 5 years.

      e. Export the first 3 references directly into RefWorks, then move them into your EHS 460 folder.

      f. Were you able to accomplish these steps successfully?

      Circle: YES | NO
