There is a lot of violence going on these days. Gangs going around killing people. People fighting each other because something was brought up between them. People robbing other people. This all caused by violence.

Violence has affected my life in so many ways. It affects me socially, mentally and physically. It affects me socially because sometimes on the news they might announce a shooting in my neighborhood. It also affects my life mentally by people calling me names. Then it affects me physically because many people might start to hit me.

There a lot of things that causes youth violence in our world today. For instance if you don’t have enough money but you know someone that always has a lot of money. Then you might feel to have the nerve to rob them for their money. Also another thing that causes youth violence is the trash – talk that goes around the neighborhood sometimes. Which lead to people jumping other people.

If I were able to stop violence I would do everything I can to stop it. For instance if I saw two friends fighting, I would walk up to them and tell them to stop because there is no need to fight. Then if I saw a bully, bullying someone I would tell him to stop. Then I would create a prep-rally to stop bullying and youth violence so I can at least decrease youth violence in the world today.

There is a lot of violence going on these days. Gangs going around killing people. People fighting each other because something was brought up between them. People robbing other people this is all caused by violence. If there were no violence in the world the world would be a better place.
