Violence affected my life in many ways, one of those ways are me being scared to come to school. The second way it has affected my life is keeping me worried about the safety of my family. The third way it has affected my life is by making me feel like I’m in danger.

The causes of violence are people getting hurt or sent to the hospital. Another reason is people getting shot or maybe even killed. One of the major things it can cause is possibly losing a family member.

The things I can do about youth violence are making a club and protest about what we can do to stop it. Another thing I can do is put up signs and tell people what they can do to stop youth violence. I can also try to make a commercial and explain what people can do to end youth violence.

Those are something. What can you do!!!
