How has violence affected my life. Violence has affected me because people are being killed and people being hurt. Bullets flying where do they land on the ground, in houses. The police are investigating asking questions to see what happened and see who got hurt so doctors can take care of them. I like to make sure they're still alive or if they're hurt, they can heal the injured person. Like if there's a bullet stuck in one part of their body it can be extracted.
