How has violence affected my life?

Violence has affected my life because every day I wake up wondering what will happen and why all these things are happening like what happened in Newtown Connecticut everything that had happened that day was for know absolute reason but the person who did it would regret it for the rest of his life and he did regret it that absolute moment he thought twice about what he did and he killed himself because of that. That’s why everyday parents are concerned about their children and wondering if their children are ok and so are the children. Violence has affected my life because people are dying and that concerns me because people are losing the people they love and care for and no one wants to lose someone they love certainly not me. Violence has affected my life because when violence is around know one fills safe we are scared to walk out our doors to walk in the streets or even go to stores because of the consequences that would happen.

What are the causes of youth violence?

The causes of youth violence is people drinking doing drugs or taking pills and many more but they aren’t supposed to because that’s what leads to people being crazy and losing their mind also what causes youth violence is owing money to someone or finding out some one has money because when people drink and do drugs they get out of control and want to kill someone. The cause’s of violence is people being in gangs because when people are in gangs they make a plan to kill someone or take money from someone and sometime gangs are the reason violence is around because no matter what happens they still continue to be in a gang and the consequences that happen they’ll still continue. The causes of violence are people fighting because when people fight they get very physical and aggressive and sometimes abusive and when they get physical or abusive someone will be physically hurt or they will just die because no one will be there to help them but they will be there to cheer them on. The causes of violence are being a bystander meaning when someone is getting hurt you’re not doing anything to help that person.

What can I do about youth violence?

What I can do about youth violence is when I see violence happen I can try to stop it or tell an adult. I would not be a bystander but I will try to interrogate, try to make everything ok, and try to make them friends but not enemies. What I can do about violence is try to encourage people that violence is not ok and that violence will physically hurt someone, but not make them feel good about themselves. It will bring them down but not cheer them up and if you do cause violence that you will regret it for the rest of your life and you will never get to go back and change what you did. That is what I would do about youth violence.
