Youth Violence

I have seen people and some of my friends get bullied, bulling is bad and it can make people take their own lives because of it. People bully other people because of their own problem’s at home. One of my friends was bullied, and me and him stood up to the bully, he never bullied my friend again.

Violence has affected my life because I have seen many of my friends being bullied in the past. Myself, I have been bullied. Not physically but verbally. The kids would tease me. If you are a bully, you should stop. It is bad and no one thinks its funny. Many kids kill them self because of bulling.

Some of the causes of youth violence are drugs and peer pressure and money. Gangs can cause youth violence too. Gangs can beat you up and take your things. Video games can cause violence too, for example if you are playing a game, people could go out into the real world and shoot you like the game.

What I can do to stop youth violence is when I see someone getting bullied or robed for their things I can get a adult to help them to protect myself from violence in that situation. If I see a fight at school, I would tell a teacher about the fight. I would try to prevent youth violence is I seen it happening. These are the steps I would take if I see youth violence. These are the things I would do if I see bulling around me. These are some of the examples and experiences that my friends and I have had in the past and these are my solutions to prevent youth violence from happening in the future.

Youth violence has affected my life in a positive way because I don’t want to be a bully or cause trouble or harm to anyone. I want to grow up with morals and values and have a good child hood threw out school and live a normal life as my mother and father have showed me from a young age. Doing the right thing is always a good choice and staying positive for the future.
