Violence

Violence ain't the answer
Trying to be boss
But try to be boss when you're in jail

So when you think violence is everything
And when you end up in a hospital on your death bed
You rethink your life

So when you end up in jail your life will be messed up
And you won't have a good life
So when you're out, you and your records will be over.

Have a nice messed up life because of violence?
