The violence are causes for youth because some people hit to his kid and the father don't care no more and they continued hit and don't stop, the kid grow with hate to his parent and sometimes some teen kill his father.

The violence affect my life because they don't going to have a good futures and family, because they going to stay away from his father or maybe they father going to in a jail or did cause to teen.

I can do to the violence is call the police and if the violence not stop I going to do a meeting with 100,000 people to protect about violence and make a rules that the father hit to the kid somebody need to call 911 and they going to jail for like 20 or 30 years.
