One summer night my brother and his friend were sitting on my front porch and I was looking out the window. Then a mysterious car came out the blue and it was a baby blue mustang. As the car approached my house the window came down then all I heard was 2 gun shots. Then when I looked out the window and saw the car drive away. I went to the door to see if my brother was ok and luckily he was. But there were small holes in my house and my mailbox had to be repaired. This made afraid to go outside at night.

I think this was a mistaken identity that could have cost his life. I do not know why this happened. This may of happened because some people might be in a street gang. My community should make better decisions. To avoid this from happening people in my community should not play violent video. If I see or hear something violent I will try my best to stop it and say its not worth it to fight.
