Do the right thing.

What we should do to do the right thing is listen to our teacher in school and to our parents because they want to help us do better.

“We can also do our homework because that’s making us better also so that’s why we should do it. Homework is a piece of a thing that you learned that day. That also why you should do your homework. It also pass you on to the next grade."

The reason why we should pay attention is because it’s cool to learn and to learn new things as well. People might not like school but I do. Because, I want to go to college.

That why we need to do the right thing.
