Essay- Violence

Violence is not good. Violence is an extreme form of aggression, such as assault, rape or murder, violence has many causes, including frustration, exposure to violent media, violence in the home or neighborhood and a tendency to see other people’s actions as hostile even when they’re not. Certain situations also increase the risk of aggression, such as drinking, insults and other provocations and environmental factors like heat and overcrowding.

The violence is very common. We see violence in our neighborhood, in our family and in whole word. I think that violence had been around for too long and I believe if everybody work together we can change that. We can say no more violence, no more suffering, no more kill and no more pain.

Violence had affect my community. In Dominican Republic there was a strike and a little girl got hit by a gun. She had to go to the hospital and she is almost dying. Violence can also affect your own neighborhood. If you are a victim of violence never ever be afraid of tell the police or somebody that you trust because the consequences can be very hard.
