Violence affected my life by in my old neighborhood a lot of people got robbed at my aunt's house they sneak in the building and stole all the jewelry. My aunt said that they only came to get the jewelry because there was a fifty dollars in the drawer and they didn't take it. My cousin said that they sneak in through the window because they left it open and a stole to reach the window.

The causes of youth violence is bullying happening and name calling and other things people do to hurt others or affected there lives. It is bad to bully someone because they can kill themselves just because of you.

What I can do about youth violence is stop it. For example if there a fight call the police and tell them what's happening, and if I see something happening
