How Has Violence affected my life?

Violence has affected my life by hearing about bullies, seeing people getting hurt, and seeing people get picked on. Every time, almost everyday I hear that people have been shot, in car accidents, people get killed, also I heard about physical violence, mental violence, and sexual violence. Bully has been going on for about thousands and thousands of years. Most people in school, like teachers, found a way to stop "Bullying." It hurts my feelings that little kids get into accidents and parents plus middle schoolers, high schoolers. Sometimes people getting drunk, or smoking can cause physical violence. That is how violence affected my life.

What are the causes of youth violence?

The causes of youth violence is that there is lots of physical violence and mental violence. Teens, as in teenagers, have lots of physical violence. I heard a lot of things about "cyber bullying." Tees, sometimes dare them to fight outside the school, in the park, and other places. Name calling, some people do, is a violation, the way you say it, and how you use it when you speak. That is the causes of youth violence.

What can I do about youth violence?

What I can do about youth violence is that I can talk to teachers about youth violence, they can print it, and I could type everything there is to know about youth violence. Also we could make an anchor chart about youth violence. We can look up youth violence and
take some ideas. We can also make these ideas and turn them into thesis statements. We can do everything it takes to know about youth violence. Youth violence is outside, in the park, at night, out side, out side the school, in a building, in the parking lot, it could also happen in a after party or before a party. We can look in areas of where or when youth violence has started. That is what I can do about youth violence.
