Do The Write Thing

I see violence on the streets
In my neighborhood
All over the place
On the streets
Especially at school

It makes me feel mad and bad knowing the people I love could be in danger
It makes me feel like to start violence
I feel scared myself knowing it could affect my life
But I know that if I start it will just make it worst
Violence is like a disease that infects you slowly but I'm not goin' to get infected

All this happens because of bullying between friends
Teenagers see someone with something they want and start a fight over it
Surroundings start violence with where you are and who your with
School you can be there thinking you're safe but you really know your not
These are the causes of youth violence

I have the power to stop violence in many ways
One of the most easiest ways come together with your friends and think it out
Talk to your community and see what's wrong
These are ways of how I can stop violence
