"Violence Is"

Violence is the black cloud that hovers above us all
Violence is the monster that drives our friends and loved ones away
Violence is the gun that shoots randomly into the dust killing innocent bystanders
Violence is the retaliation of the ignorant people

Violence is the sounds of guns in the street that echoes through neighborhoods

Violence is the weapon of a man used to prove a point
Violence is the sorrow and pain of moms crying and wishing that it wasn't real
Violence is the only thing that man can get rid of
All we could do is hope that it doesn't rain under Violence
