Violence

1. One thing that affected my life was seeing people treating animals bad.

2. What causes violence is not liking something or someone or treating them the way they are not supposed to be treated. Violence is something that makes a person do violence is something very bad. It makes them do bad things like treat other bad, fight bully, and also talk bad about others.

3. Something I could do to avoid violence is have police in schools have them in many places seeing what other people are doing and if they are treating animals and people wrong.
