Violence in my life

Violence has affected my life because I used to live near gang members and my mom always said to me "That if you didn't mess with the people around your street it's the safest place." So I didn't but somehow I seemed to mess with them and got myself in problems with people. But I told them that I didn't mean to and I hope we can be friends and they said "It's cool dude" the reason I messed with them was because I saw them play football and basketball and have fun and I wanted to always play with them. But here's part of his story. My friend used to get himself in trouble because he would hit on gang members' girlfriends and I would just watch him. Also he would agree with some guys everyday and throw up gang signs and they kept shouting at him "we
Apologies for any confusion.

I used to live in the

preservation house. But I

now have a different

address where I

used to live.

"It's too hot." It's
good that I

went to school.

I have new friends,

good food and

good weather.

I work hard and

try to rest. But

I am still not

happy.

Apologies if

there is any

misunderstanding.

I'm just being

honest. I

appreciate

your understanding.
are going to kill you." Then one day I went out to play and I saw blood so I followed it and then I saw his body all cut up and almosted beat to death.

The cause of violence are that people will say one thing to one person will take it the wrong way and start end a fight. Another way is that gangs we all lived somewhere with gangs and they kill people and don't really care.

How I would change it is I would make a rehab center were gang members will go and learn that they have a gun it's called there minds and every time you read a book it gains more bullets until it's fully loaded. That's how I was affected by violence and how I would change it and what causes it.
I am really interested in your project. I think it's a great idea. I would love to be part of it. I have some experience in this field. I think I can contribute a lot to your project.

Another idea is to have a local event where people can come and talk about their projects. It could be a great way to share ideas and learn from others.

I would also like to suggest that we consider having a mentorship program. This would be a great way to help people develop their skills and get feedback on their work. I think it would be very beneficial for everyone involved.

As for the technical aspect, I would suggest that we use a database to store project information. This would be very useful for keeping track of everything and for finding information quickly. I have experience with databases and I think it would be easy to implement.

In conclusion, I think your project is a great idea and I would love to be part of it. I think we can make it even better with some additional ideas. Let me know if you have any questions or if you would like to discuss further.
