Violence has affected me because me, I have had to move several times to try to get away from it. My family members had to spend so much money on places for us to live. I know they could’ve saved it for themselves, but while there is so much violence around the world, we have to move to different places.

The causes of youth violence are drugs, guns, drinking, bullying, smoking, spreading false rumors, etc. These things can cause things that our environment doesn’t need.

For stopping youth violence, we could make a commercial, or even stand outside holding up signs, like I used to. Me and my grandfather would go to a certain spot and hold up signs. The signs say, “Keep our community drug-free!” We would have people keep their homs if they agreed with us.

To stop youth violence, I can get other people who want to stop youth violence. That’s how I can stop youth violence.
The course of events may influence the outcome. For example, if I decide to buy a new car, it may affect my monthly expenses. Additionally, I think that my current job may not be the best long-term solution. I am considering looking for a position in a different field or industry. I believe this could lead me to greater opportunities and satisfaction.
