Violence

This is the life of violence. This thing we call violence that we think we know but in the face of reality we don't. Violence has been in my life but I choose to explain the danger of violence instead. Violence is gangs, aggressive, and fight. Even if you're standing by watching it happen be here you are. Being a bystander.

We can make it stop.

I think that if we work together as unison we can stop it. I think it's time someone stood up once and for all. The same way MLK stood up against slavery. Someone can stand up against violence, the same way Rosa Parks stood up against discrimination. We can stand up against youth violence.

The only reason why we still have violence is because no one wants to stand up against it but yet they want violence to disappear. How in the world is this going to happen? The same way no one likes what happened to the children who go to the Sandy Hook school that passed away. Well if they don't like it then they should do something about it.
Do The Right Thing:

If you read this and are part of violence or even participate in it, you should drop the guns, knives or whatever weapon you are using, rise above it all become a better person "do the right thing". Instead of killing you should save lives, instead of being with the violence be against it again rise above it all, instead of stealing give to the poor. You should be the bigger person. It will make you feel better that you made a difference instead of haunting people you hate find people you love.
Don't be about it

Violence: Its gangs, fights, murder.
I know you didn't mean to hurt her.
Our future could be bright.
If you just hold on tight,
don't be a fool.
Just go to school.
I read a book and
that's all it took.

1 2 3 BOOM

There goes a body.
drop the gun, don't be about it.
People might die.
That ain't no lie.
Picked up the pencil make it right.
drop the gang violence and stop the fights.
you can be a doctor, lawyer or even a nurse.
Just remember you education comes first.
Drop it stop it don't be about it.
