Violence

Violence affected my life in many ways. Just by being a bystander can get you into a lot of trouble. Violence can hurt people badly. Violence hurt me because it lead to friends, and family members getting shot and killing themselves.

Youth violence is caused by many things. One thing that causes youth violence is TV shows they cause kids to do it because kids like to do what is called monkey see monkey do. Once they see violence on TV they think it's cool and to do it on the streets.

What we can do about it is take away all the weapons. Also we can take away everything that causes the youth to behave the way they do.
