My Violence Day

Violence happens a lot in life. Lots of people died because of this and they lost their family members. Causes of violence is bullying, abuse, jealous and more. These are causes of violence because people died or gets really hurt because or it. I believe we should try our best to stop violence for the safety of the world. If this happens our world will be a better place. Violence affected my life because now some things that I do, I am scared to do them.

Violence once happened in my own house. My mom’s boyfriend showed violence to my mom. It was a bad day but now they are fine together. This is what happened that day, it was a day when my little cousin was sleeping over. My mom and her boyfriend started arguing during mid night. I could hear them a little because I was half asleep that night. I had to sleep with my cousin and she was a bad sleeper. But then I went back to sleep. 2 hours later I heard arguing again. But then a couple more hours later my mom comes running into my room saying “Kenia get up. Kenia get up. He tried to kill me.”

I woke up as fast as I could. Then went to see what was going on. Then I went to my mom’s room and got my baby brother because he was awake. When I get in my
mom's room I saw lots or things on the floor. I took my baby brother. But they was still arguing. But then I finally figured what was going on, my mom's boyfriend choked my mom but my mom didn't give up and she fought back. She took the remote that was near her and hits him in the head. I was so sad. I really wanted to cry because I could have lost my mom but the tears wouldn't come out. I was extremely mad. I wanted to hurt someone badly but I knew I should calm down. See this is when violence almost became a part of me. That night the police came. It was a tough night. See violence happens everywhere and this violence was because of jealousy and "he said, she said" which turned into abusing. Violence is a hurtful thing.

There is also youth violence which is violence that happens to kids, teens, or young adults but people still gets really hurt. Because of violence I'm scared when I'm home by myself. The thing to do about any type of violence is to start a violence free program so you can help yourself and others. You can also help people by trying to stop it when they are about to do violence. In my case I could have called the police so they could have stop fighting. This is how violence affected my life and what I could do about it.
