What is violence?

Violence is when someone tries to hurt one another. Violence also means when someone gets hurt by a knife, gun, etc.

How has it affected your life?

Violence affected my life by not living in a safe neighborhood. My neighborhood always has flashing lights at the end of the street. It makes me feel like nowhere is safe. There is always gun shooting, people fighting, and also gangs of people. Everytime Im scared to walk to the corner store by myself. You may never know if they are selling drugs or doing other stuff. What I want is the world to be safe.

What can you do to stop violence?

I can stop violence by not having a gang, if somebody catch me in a gang they are suppose to report immediately to the cops and deal with this at court.
