Violence where you wouldn't expect it.

Violence affected my life because of bullies and the watchers. Yes! Watchers, let me explain clearly. I got bullied by being good at something because the bullies are jealous and doesn't feel good themselves so they take it out on people. That was the cost of me being a victim. The bully beats me up. The watchers laugh at me. When I'm in pain, the next day I'm humiliated and I tell my mom to take me to a different school.

The cause of youth violence would be that the victim would join a gang and beat up the bully. This could put victim and bully in question by police. Both victim and bully can get kicked out of school and in life. If robbing and shooting.

To deal with youth violence, you can talk it out and explain differences. Also bully can explain why he did that and apologize.
the watchers shouldn't encourage it, they should break it up. Because if they encourage it would get worst.
