Do the write thing

I'm not involved in violence but I see it everyday. I see many people fighting and hurting each other. When people start lies and bully each other it causes a lot of violence because people will get mad. I also think drugs, and being around with the wrong people causes a lot of violence. I think that because if you are with the wrong people, you can get in the middle of a gang war or some violent fight.

This violence affects me because I need to be more careful when I'm going out, and I need to watch out who I talk to and hangout with. I need to watch out because the people I hangout with could be doing the wrong things, and then I could get involved. I see many violent fights and arguments and I think about what I could be doing instead of just sitting there and watching it. Violent people need to stop what they are doing cause there is many people that are afraid to step out their door cause they know they could get shot at or killed.

A way that I can stop the violence for me and for anyone around me, is to stay away from people that you know are violent. If you are a victim of violence you should report it to the police cause it will get worse and the person might end up hurting you really bad, or scarring you for life. If anyone ever threatens you or pressures you talk to someone about it so that they could help you, and think again before you do something that you know will hurt your future, yourself and your family and friends. You should never be forced to do something you don't want to.
