Unhealed Pain

Knives were thrown
Bullets were shot
Another body is gone
By the tick of the clock
Somebody's been shot on my street
Who's gonna be next...
He?

Scared of losing a loved one in my life
Violence has kept me up at night
I toss and turn
I don't feel right

Why can't this violence come to an end?
We should unite and be friends
But no
Everybody wants to be right
So their solution is to fight

More laws about violence are needed
So that these criminals and bullies can be defeated
So let's put them to the test
And put them under arrest

Violence can throw you off track
Talking about your feelings can bring you back
To the person you used to be
And you will be set free
